## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 65 and 70-80 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tang et al in view of DeKoven for the same reasons as urged in the third office action.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 80 is rejected under 35 U.S.C. 102(a) as being anticipated by DeKoven et al for the same reasons as urged in the third office action.

### ***Claim Rejections - 35 USC § 103***

Claims 82-94 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dekoven et al for the same reasons as urged in the third office action.

### ***Response to Arguments***

Applicant's arguments filed 7-19-02 have been fully considered but they are not persuasive. Applicants argue in the paragraph bridging pages 4 and 5 of their response

that " The coloring agent is not deposited via ink jet printing and is deposited onto the patterned non-wettable resin, not the substrate." The examiner is not convinced by this argument since DeKoven et al Discloses in col. 1, lines 41 to 45 "a technology is disclosed which uses the ink jet method to distribute 'coloring matters' of three colors on the substrate." The fact that the publication also discloses a dispersion pattern that prevents ink blotting in no way diminishes the anticipatory value of this disclosure. Since applicants have not argued the limitations of the dependent claims they must agree with the examiner that these claims must stand or fall with the independent claims.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
